

## Chamber Learning Network

In collaboration with the BC Chamber of Commerce, the Chamber Learning Network™ is currently partnering with local chambers across British Columbia to create individually branded online training centres where member businesses can purchase online training at a discounted rate at **no cost** to the local chamber. This opportunity provides a substantial benefit to members and increases chamber revenue with **minimal administration** on the part of participating chambers. The Chamber Learning Network™ is currently delivering 4,000 different workplace-training courses and over 1,000 instructional videos online.
